Table with columns: Object, Date, UT, alpha2000, delta2000, Mag., N Obs., and multiple columns of numerical data representing astronomical observations.

Table with 11 columns: Item ID, Date, and numerical values. It contains two parallel lists of items (AZ, AC, AM, AU, etc. on the left; OL, OO, OQ, etc. on the right) with corresponding dates and values. Includes some text annotations like 'R', 'V' and '1'.

Table with multiple columns containing alphanumeric codes (e.g., 2000 XO39, 2003 08 02.53493), numerical values, and a final column with codes (e.g., 704, 691, 644). The table lists various data points across 28 rows.

Table with 13 columns: Year, State Abbreviation, Date, Time, Location, Change, and Reference Number. The table lists various astronomical observations from 2001 to 2003.

Table with 12 columns containing alphanumeric codes (e.g., 2002 PQ80), dates, and numerical values. The table lists data for each day from August 8, 2002, to August 17, 2002, with multiple entries per day for different codes.

Table with multiple columns of numerical data and alphanumeric identifiers (e.g., 2002 PJ132, 2002 PX134). The table lists various identifiers, dates, and numerical values across two columns. The left column contains identifiers such as PJ132, PR132, PU132, PG133, PO133, PQ133, PV133, and PX134, often with subscripts. The right column contains similar identifiers like PX134, PY134, and PZ136. Each row represents a single entry with associated numerical data.

Table with multiple columns containing alphanumeric codes (e.g., 2002 RH239), dates (e.g., 2002 09 16.29170), and numerical values with units (e.g., 22 41 07.05 -03 49 13.0 20.0 R 608).

Table with multiple columns containing alphanumeric codes (e.g., 2003 FK94, 2003 HM16), numerical values, and some text labels (e.g., R, V). The table lists data for various categories and sub-categories across multiple rows.

Table with 12 columns of numerical data, including dates (e.g., 2003 OD31, 2003 OE31) and values (e.g., 2003 07 30.37329, 00 01 00.13, +03 52 00.7, 19.0, 704). The table lists various identifiers and their corresponding numerical values across multiple rows.

Table with multiple columns containing numerical data and identifiers (e.g., 2213, 2003 08 12.26802, 16 31 41.16, -18 09 42.3, 17.3, 608, 3878, 2003 08 14.46107, 20 33 35.03, -17 07 55.7, 17.3, 608). The table contains 100 rows of data.

Table with multiple columns containing numerical data, likely representing astronomical observations or measurements for various objects over time. The data is organized in a grid format with rows corresponding to object IDs and columns to different parameters or dates.
